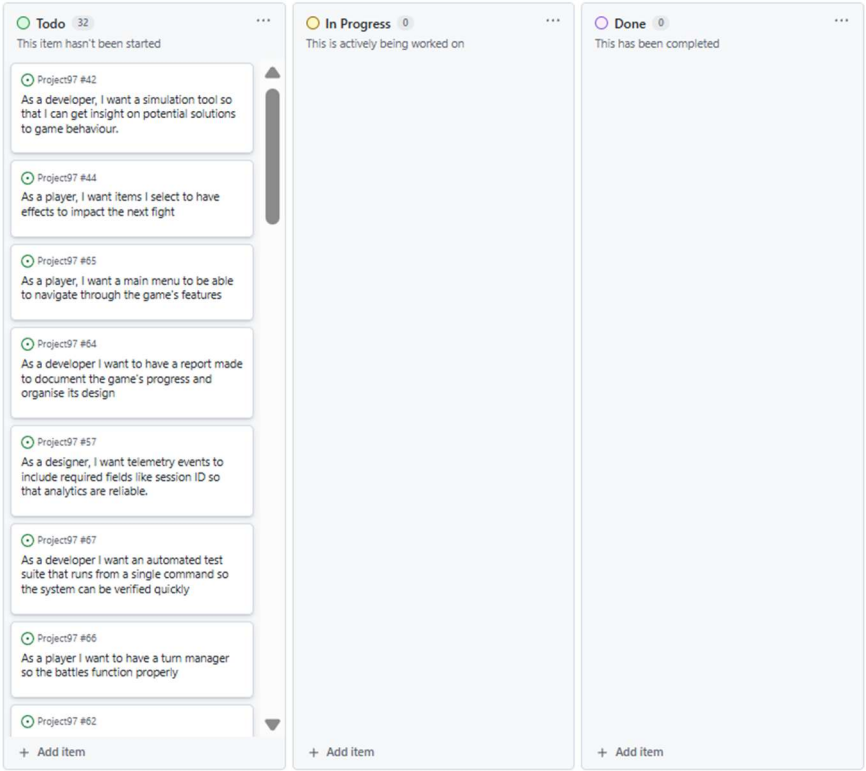
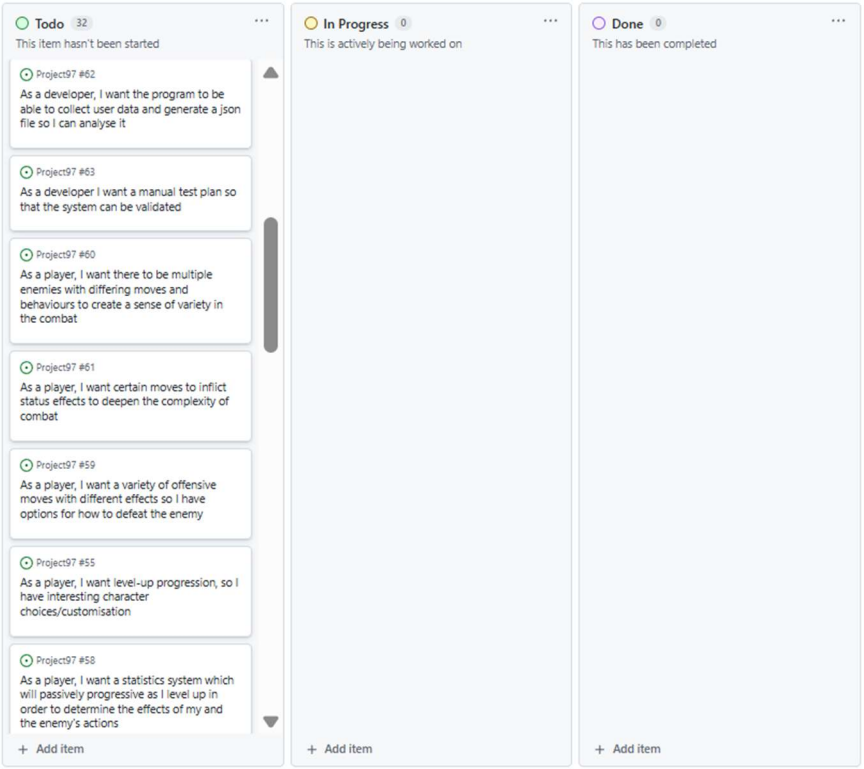
Scrum Board Snapshots

16th January





Todo 32
This item hasn't been started

Project97 #56
As a player, I want a menu to select level up options from to interface with the progression system

Project97 #54
As a player, I want to have defensive moves so I can protect myself against the enemy

Project97 #45
As a player, I want there to be difficulty options so I can customise my experience

Project97 #46
As a player, I want to have a menu to select items before a fight so I can customise my character's options

Project97 #47
As a player, I want a checkpoints system so that I can restart after I die without going to the beginning of the game

Project97 #48
As a player, I want enemies to have dialogue before/after fights to create a sense of character and narrative

Project97 #49
As a player, I want enemies to have semi-random decision-making routines for selecting moves to create challenge and unpredictability

Todo 32
This item hasn't been started

Project97 #50
As a player I want to be able to choose my starting moves to customise my characters initial options

Project97 #68
As a designer I want to be able to adjust parameters in the dashboard and get an updated prediction of the effect this change would have on the game

Project97 #70
As a developer, I want automated tests to ensure action points never go negative so that players cant go over their AP budget by selecting moves.

Project97 #71
As a player, I want an action point system, so I can manage resources

Project97 #72
As a player, I want move choices, so that I can create different strategies

Project97 #73
As a player, I want a move menu display, so that I can see what moves I am picking

Project97 #74
As a player, I want enemy sprites, and backgrounds so I can have an idea of what I'm fighting and where

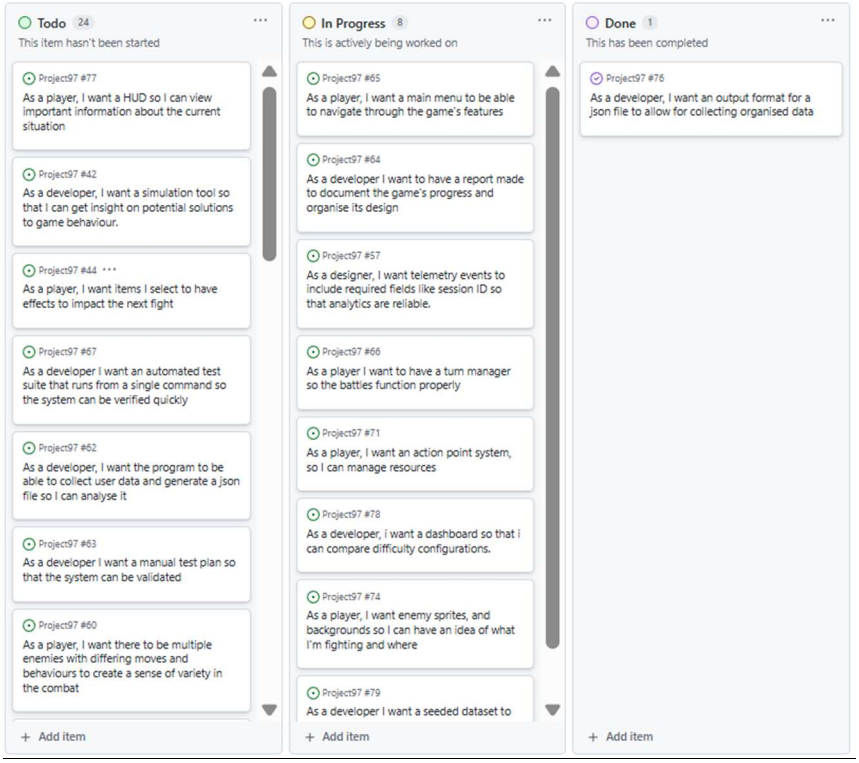
23rd January



Todo 24
This item hasn't been started

Project97 #61
As a player, I want certain moves to inflict status effects to deepen the complexity of combat

Project97 #59
As a player, I want a variety of offensive moves with different effects so I have options for how to defeat the enemy

Project97 #55
As a player, I want level-up progression, so I have interesting character choices/customisation

Project97 #58
As a player, I want a statistics system which will passively progressive as I level up in order to determine the effects of my and the enemy's actions

Project97 #56
As a player, I want a menu to select level up options from to interface with the progression system

Project97 #54
As a player, I want to have defensive moves so I can protect myself against the enemy

Project97 #45
As a player, I want there to be difficulty options so I can customise my experience

+ Add item

In Progress 8
This is actively being worked on

Project97 #64
As a developer I want to have a report made to document the game's progress and organise its design

Project97 #57
As a designer, I want telemetry events to include required fields like session ID so that analytics are reliable.

Project97 #66
As a player I want to have a turn manager so the battles function properly

Project97 #71
As a player, I want an action point system, so I can manage resources

Project97 #78
As a developer, i want a dashboard so that i can compare difficulty configurations.

Project97 #74
As a player, I want enemy sprites, and backgrounds so I can have an idea of what I'm fighting and where

Project97 #79
As a developer I want a seeded dataset to be able to test the dashboard and rule parameter adjustment

+ Add item
